SCS PROJECT DIRECTOR SERVES AS A BOND OVERSIGHT COMMITTEE MEMBER, AND GIVES BACK TO HIS COMMUNITY

HAWTHORNE, CA (May 2008) – Seville Construction Services, Inc., (SCS) Project Director, Roger Banuelos volunteers his time to serve his local community as a member of the Bond Oversight Committee for the Wiseburn School District.

In 2007 the Wiseburn School District successfully passed Measure A, its 3rd facilities bond for the amount of \$32 million. Measure A, passed by an 82.5% approval rating by the local community. Roger was active during the campaign speaking to members of the community, distributing pamphlets, and knocking door to door in support of the measure. The money from this latest bond measure will go toward a total rebuild, from the ground up, of Juan Cabrillo Elementary School, a 400 student K-2 campus. The 58-year-old Cabrillo site will be the last in the four-campus district to be redone. There are also other projects, as a part of this Measure, in the planning phases that will be done to support the District's functionality and growth.

Roger is currently working as a Project Director in support of SCS' involvement on the \$370 million Rancho Santiago Community College District Bond Program. Roger has been in the construction industry for over 16 years and holds a Bachelor of Science degree in Civil Engineering from the University of Southern California; he intends to bring that experience and knowledge to bear to the committee and the School District to successfully deliver another modernized campus to the District and the community.

"I live in the community, my kids go to school here, the choice to serve on the committee was the right thing to do" said Roger Banuelos

Seville Construction Services (SCS), is a multidisciplinary planning, engineering and program/construction management firm known and respected for our work in facilities, transportation, aviation, water, energy projects. The firm offers planning, engineering, quality assurance/control and program/construction management for projects ranging from \$10 million to \$20 billion. SCS projects touch the lives of millions of people every day whether going to work, going to school, going home or drinking tap water. We provide the highest quality of professional services in the development, planning, design, and construction of aviation, transportation, facility, water/wastewater, and energy projects throughout the Western United States. From educational, and aviation programs to world seaports, bridges and water supply facilities SCS is involved in designing, building and managing the construction of some of the country's largest and most complex construction projects.

SCS is headquartered in Los Angeles, CA; the firm has offices throughout California, with experts in the fields of planning, engineering, program management, construction management and specialty technical services. For more about SCS, please visit us at www.sevillecs.com
