SCS TO PROVIDE CONSTRUCTION MANAGEMENT AND STAFF AUGUMENTATION SERVICES FOR RIVERSIDE COMMUNITY COLLEGE DISTRICT.

RIVERSIDE, California (January 29, 2008) – Seville Construction Services, Inc., (SCS) was selected to provide construction management and staff augmentation services in support of Riverside Community College Districts' \$350 million Measure C facilities bond program.

In March 2004, voters approved Measure C, a \$350 million bond measure to improve local student access to job training and four-year college preparation classes, improve campus safety, add and upgrade science, health, technology, academic classrooms and laboratories; expand public safety, police, firefighting, paramedics and healthcare training facilities; repair, acquire, construct, equip buildings, sites, classrooms and other facilities on RCCD campuses or educational sites.

Measure C was needed because state funding for community colleges is very low when compared to funding California State University and University of California campuses receive. In addition, this funding is uncertain and can drop from one year to the next. In order to continue to meet student needs, handle enrollment growth on the newer campuses in Moreno Valley and Norco, modernize decades-old classrooms and buildings, and develop new programs and facilities, RCC needed a stable source of local funding. Measure C provides that funding.

SCS was selected in 2007 out of a pool of 19 other firms due to their experience with California Community Colleges and CM Multi-Prime delivery method. SCS is currently serving as construction managers at several other Community Colleges across the State.

Seville Construction Services (SCS), is a multidisciplinary planning, engineering and program/construction management firm known and respected for our work in facilities, transportation, aviation, water, energy projects. The firm offers planning, engineering, quality assurance/control and program/construction management for projects ranging from \$10 million to \$20 billion. SCS projects touch the lives of millions of people every day whether going to work, going to school, going home or drinking tap water. We provide the highest quality of professional services in the development, planning, design, and construction of aviation, transportation, facility, water/wastewater, and energy projects throughout the Western United States. From educational, and aviation programs to world seaports, bridges and water supply facilities SCS is involved in designing, building and managing the construction of some of the country's largest and most complex construction projects..

SCS is headquartered in Los Angeles, CA; the firm has offices throughout California, with experts in the fields of planning, engineering, program management, construction management and specialty technical services. For more about SCS, please visit us at www.sevillecs.com
