SCS TO PROVIDE PROJECT AND, CONSTRUCTION MANAGEMENT SERVICES TO THE RANCHO SANTIAGO COMMUNITY COLLEGE DISTRICT.

ORANGE, California (March, 2007) – Seville Construction Services, Inc., (SCS) is awarded a construction management contract with the Rancho Santiago Community College District.

In 2002, voters approved Measure E, a \$337 million general obligation bond to renovate existing campus buildings and construct new classrooms to alleviate overcrowding and expand the educational and training programs at Santa Ana College, Santiago Canyon College, the regional education centers and the district operations center of the Rancho Santiago Community College District (RSCCD).

Students and the community are benefiting from modern facilities and increased parking - a necessity since both campuses have the fastest enrollment growth rates of all the community college districts in Orange County

After working with several other CM firms since the passage of their bond, SCS was hired by the district in early 2007 because of our teams' background with Alternative Delivery Methods (Design/Build and Multi-Prime) within the California Community College System.

SCS has been assigned as construction managers to oversee the construction of the new Science Center at Santiago Canyon College. The state-of-the-art facility will boast 60,000 Sq. Ft and will cost an estimated \$31 million. This facility will be a combined state and bond-funded project, and will include a wide variety of classrooms, labs, and support service areas for instruction in the natural and physical sciences

Seville Construction Services (SCS), is a multidisciplinary planning, engineering and program/construction management firm known and respected for our work in facilities, transportation, aviation, water, energy projects. The firm offers planning, engineering, quality assurance/control and program/construction management for projects ranging from \$10 million to \$20 billion. SCS projects touch the lives of millions of people every day whether going to work, going to school, going home or drinking tap water. We provide the highest quality of professional services in the development, planning, design, and construction of aviation, transportation, facility, water/wastewater, and energy projects throughout the Western United States. From educational, and aviation programs to world seaports, bridges and water supply facilities SCS is involved in designing, building and managing the construction of some of the country's largest and most complex construction projects.

SCS is headquartered in Los Angeles, CA; the firm has offices throughout California, with experts in the fields of planning, engineering, program management, construction management and specialty technical services. For more about SCS, please visit us at www.sevillecs.com
