SCS TO PROVIDE CONSTRUCTION PROJECT MANAGEMENT AND RELATED SERVICES TO THE COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS.

LOS ANGELES, California, (November, 2005) – SCS is part of a team which was selected to provide construction project management and related support services to the County of Los Angeles, Department of Public Works as part of their county wide Capital Improvement Program.

The program involves renovation to existing County-owned facilities and building new County-owned facilities, while the second part involves build to suit projects where the Owner/Developers modify their facilities to meet the County's strict lease back requirements.

In performing Project Management Services for the County owned renovation and newly built facilities part of the program, our team will supplement the County of LA staff in an integrated project delivery team and will assist in overseeing and managing the work performed by the architect/engineers and contractors.

Our team will augment County staff to execute projects for DPW's user departments which include facilities such as sheriff and fire stations, courts and detention facilities, healthcare, parks, museums and recreational facilities

SCS has significant public facility project experience that includes providing program and construction management services on municipal administration buildings, public multi-family housing units, sports complexes, libraries, police stations, courthouses, hospitals and public health labs, and parks and recreation facilities. Our staff have worked for states, counties, and cities as well as numerous municipal agencies throughout the California.

SCS is a leader in many diversified markets such as transportation, public facilities, water, aviation, and power. SCS provides technical and management solutions to public agencies throughout the west.
